Business is a Contact Sport

This statement is true in all respects. In full body contact sports you are going to get injured sometime in your career. In business you are going to make the wrong decision, you are going to get financially injured, you are going to get dropped from the preferred supplier team.

If you want to get through tough times, you are going to have to make full body contact with your clients and business prospects. This means physically meet them. Visit their business. Understand who they are and what they want and need. Make your self visible.
